WHO Life expectancy Analysis

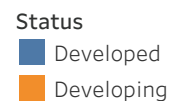

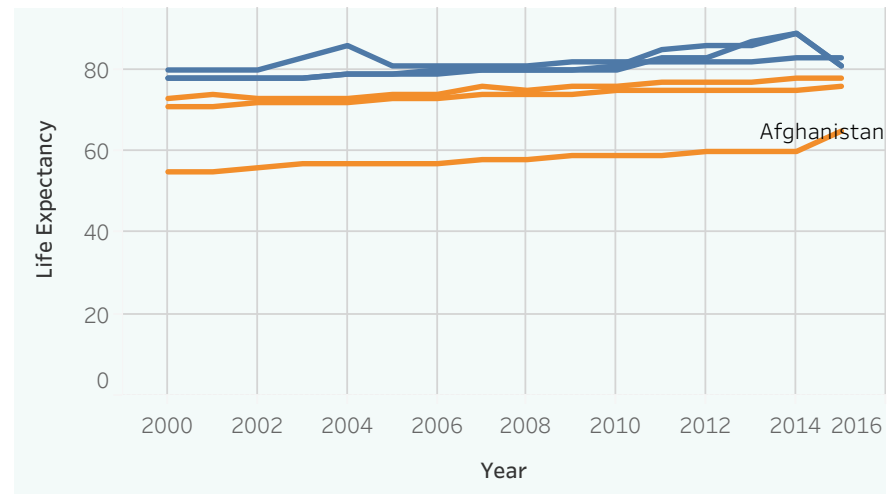

Factors Affecting Life Expectancy: Afghanistan 2000-2015

Average Life Expectancy VS Average Total Expenditure

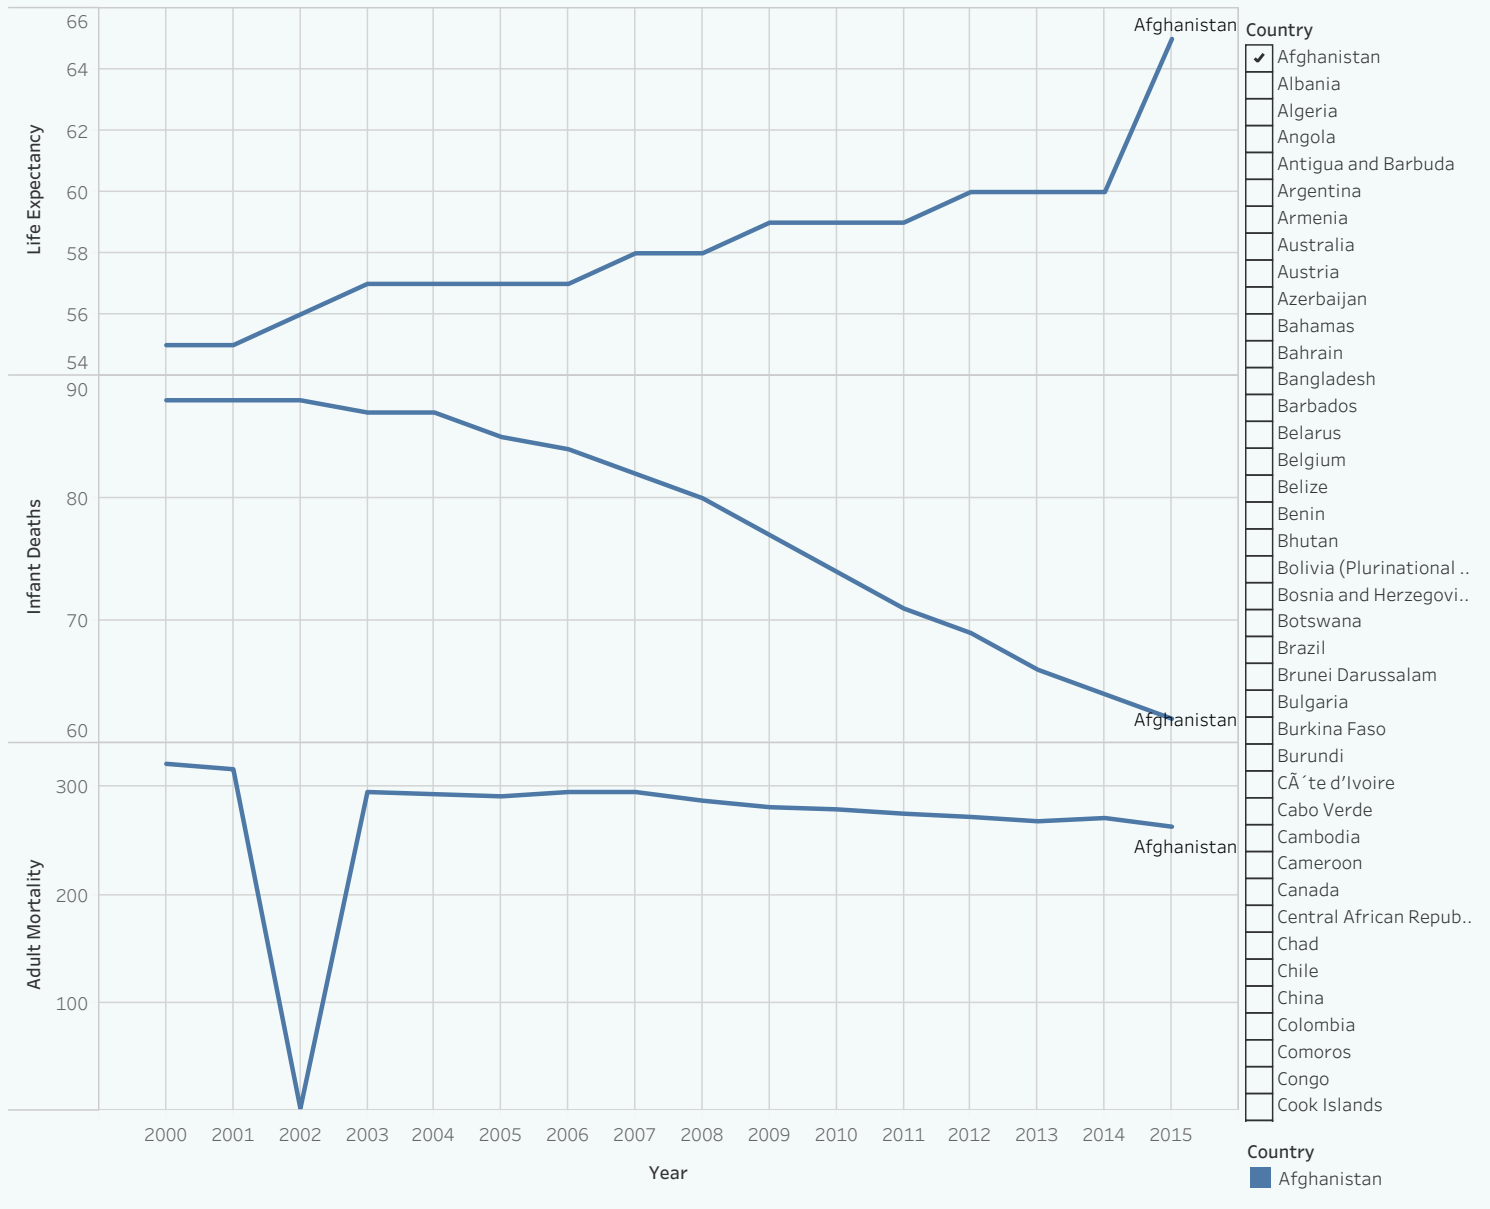

Correlation Between Status and Life Expectancy

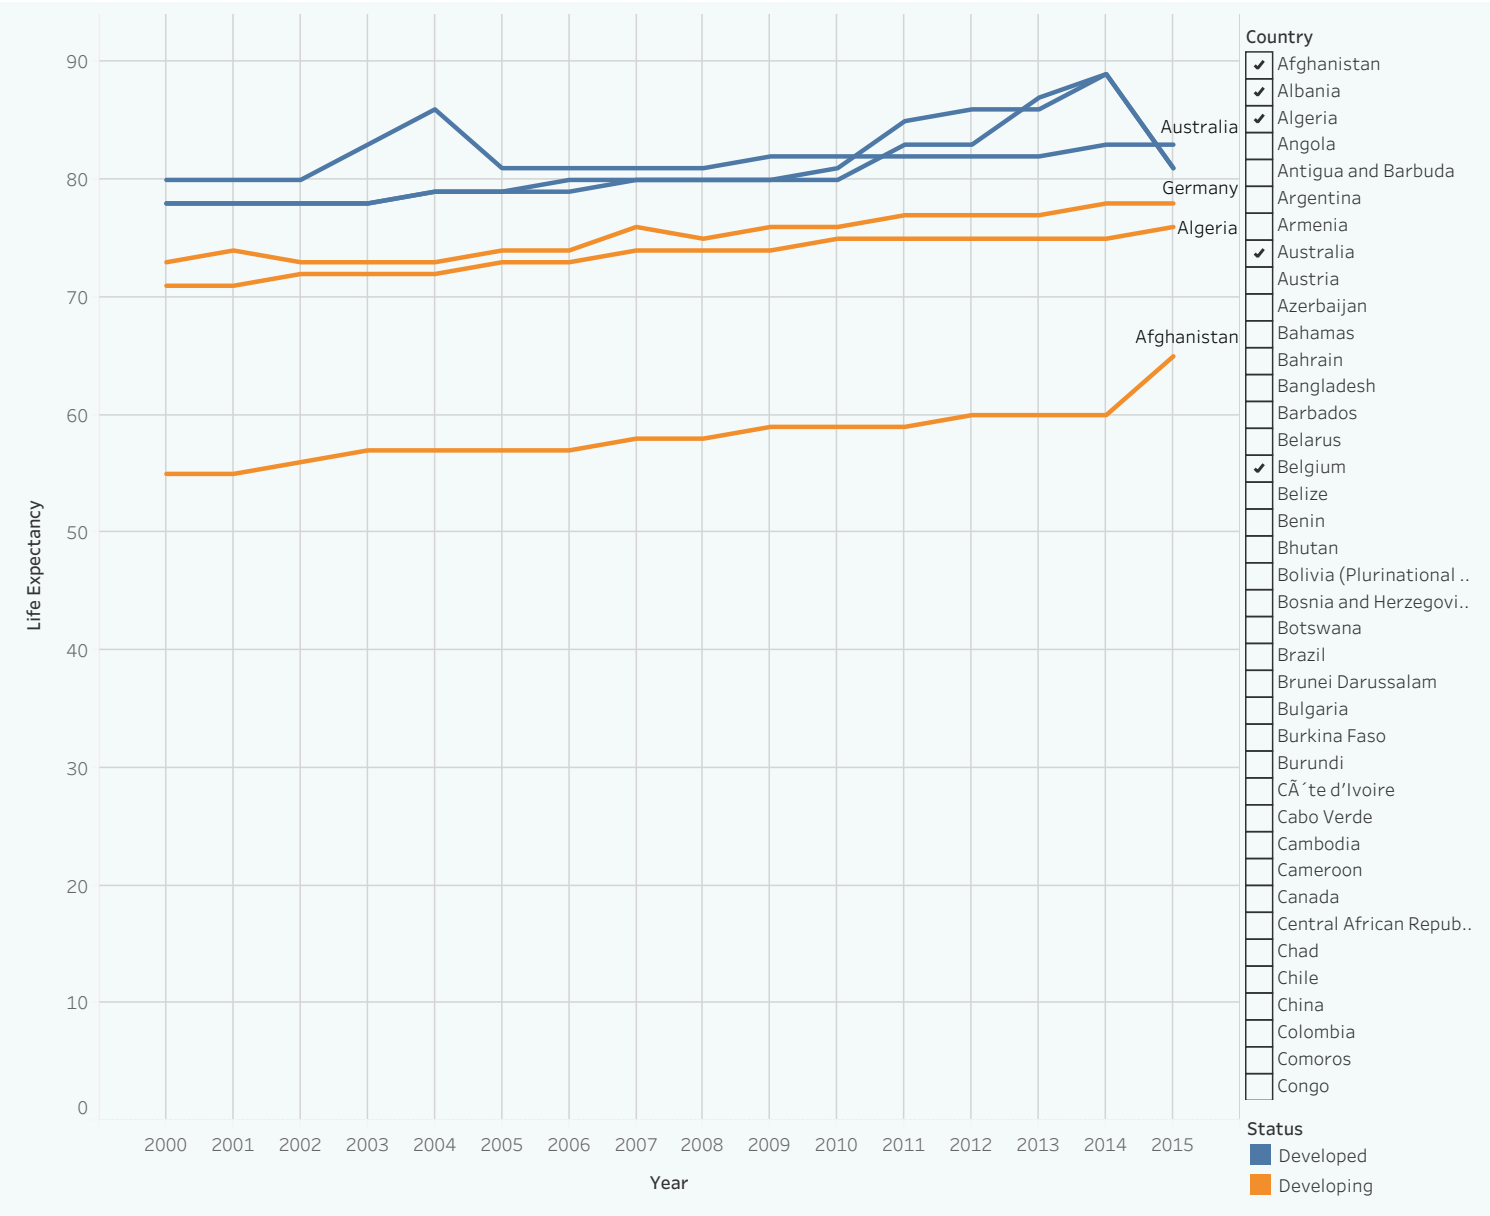

Factors Affecting Life Expectancy

Identifying potential factors that may impact Life Expectancy within a particular country. Here, we have chosen to analyse Afghanistan, a developing country, and the impact of Infant deaths and Adult mortality on life expectancy.

Correlation Between Status and Life Expectancy

Looking at the Correlation between Status and Life Expectancy, 3 developing countries (Afghanistan, Algeria and Albania) and 3 developed countries (Australia, Belgium and Germany) were selected at random. The trend shows the developed countries have sign..

Average Life Expectancy VS Average Total Expenditure

The aim here is to determine whether the average government expenditure on health as a percentage of total government expenditure has an impact on average life expectancy, therefore exploring the possibil..
